ABOUT GET A JOB

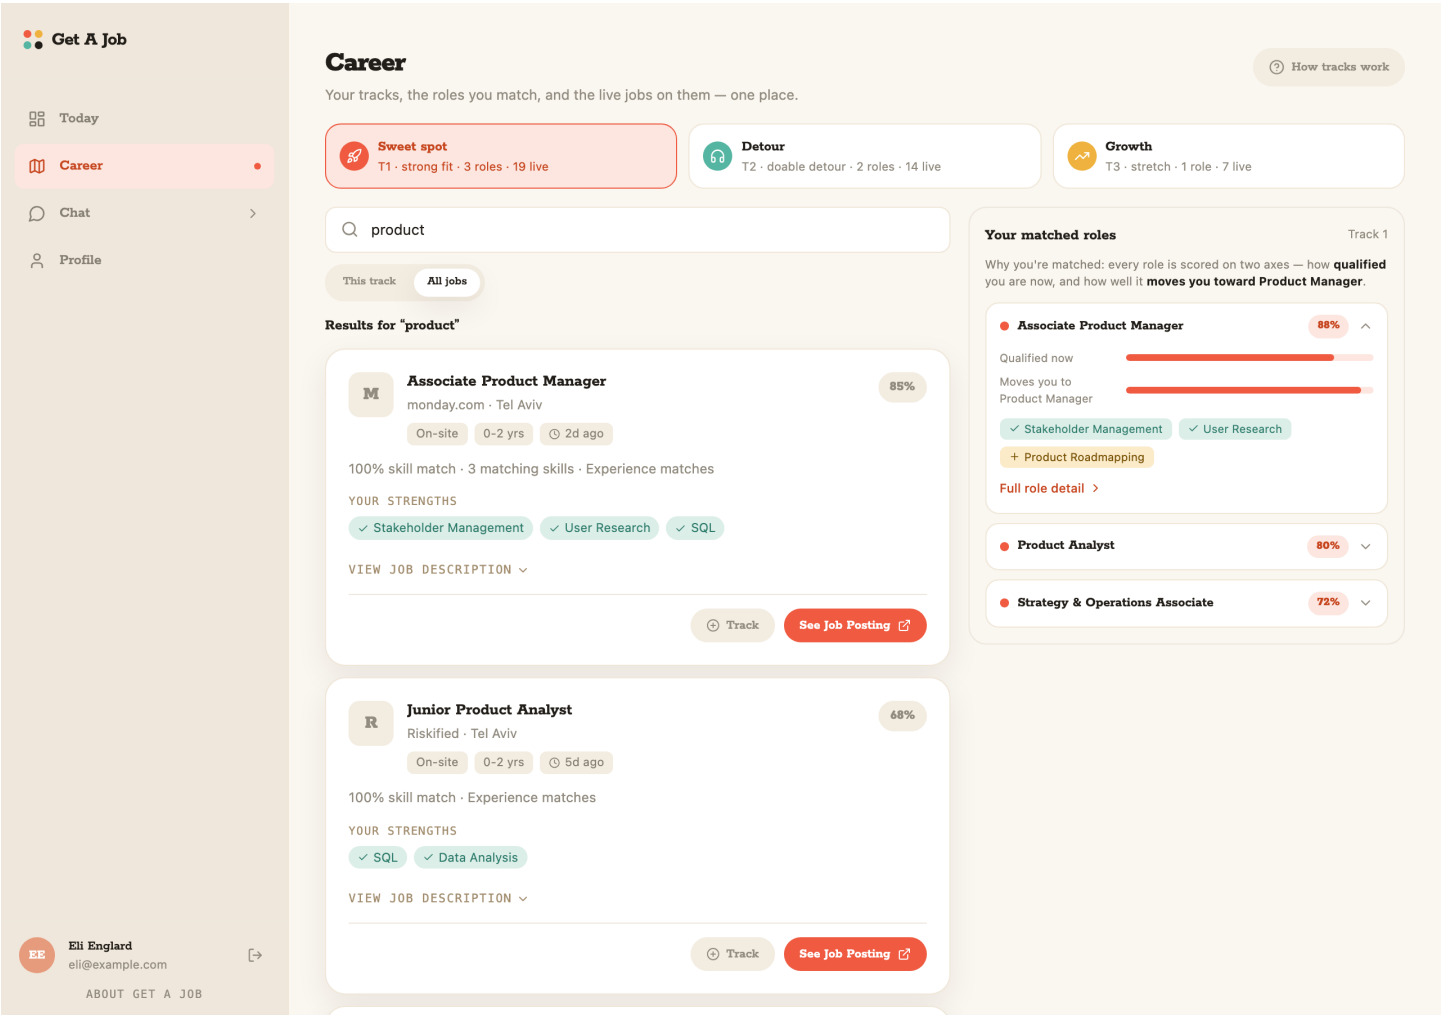

Default — Track 1 list rendered via canonical JobCard. Match badge + strengths + skill-gap chips + reason line all populated by scoreJobFit. — Desktop · 1280×900

JD expanded — JobCard's collapsible description toggle on the top match card. The collapsed-by-default + expand-in-place pattern matches Jobs.jsx exactly. — Desktop · 1280×900

Low-fit dimmed — Track 3 bypass surfaces Senior PM / Director of Product / Lead Product Ops; scoreJobFit dims the cards below 50%, RULINGS-d copy reads "shown for completeness, not recommended". — Desktop · 1280×900

All-scope search — query "product", scope = All jobs. Corpus-wide REST .ilike search, allowedSeniorities = [entry, mid] applied (no Track-3 bypass). Header reads "Results for 'product'" — no fabricated total. — Desktop · 1280×900

HIDE JOB DESCRIPTION ^

Join monday.com's product team as an APM. You'll work alongside senior PMs to scope features, run user research interviews, and ship improvements to the core work-management surface. Strong stakeholder communication and curiosity about workflow tools required.
