

BEFORE (simulated via Track 3 bypass) — all six jobs visible, including Senior PM / Director of Product / Lead Product Operations. This is what unfiltered Track 1 used to look like for early-career users: 50%+ of cards dimmed, useful entry jobs buried under the tail.

AFTER — Track 1 with the seniority pre-filter restored (allowedSeniorities = ["entry", "mid"]). Senior / Director / Lead are pruned upstream of scoreJobFit; only entry + mid roles surface; the dimmed tail is gone.
