Profile Posts Networking

Generates LinkedIn-formatted content for 6 sections from your profile + Story Bank. Each section becomes copy-paste-ready for LinkedIn.

Generate

LinkedIn baseline

Optional. Upload your LinkedIn data archive (ZIP) and the AI will compare-and-improve your current profile rather than writing from scratch.

☑ Your zip is parsed in-memory and never stored. Connections, messages, and ad data are skipped.

To get your archive: LinkedIn → Settings → Data Privacy → Get a copy of your data → "Want something in particular?" → Profile, Positions, Skills, Education (24h wait).

Import LinkedIn archive

Click **Generate** to create LinkedIn content from your profile + Story Bank.

6 sections: Headline, About, Experience descriptions, Volunteering descriptions, Skills priority, and Honors & Awards descriptions.

Tip: Upload your LinkedIn archive above first to unlock **compare-and-improve mode** — the AI rewrites your actual current profile rather than writing from scratch.

Generation takes ~20–30s. Story Bank entries supply real metrics; nothing is fabricated.

About OPTIMIZED

Refine

Business student moving into product management. At Guardio I owned onboarding for a portfolio of SMB accounts, where a two-line setup checklist cut first-week churn in my cohort. I care about the unglamorous decisions that move retention — and I'm looking for an associate PM or product ops role.
